// EXPERIENCE

Software Developer

Thrive Career Wellness | 2021 - 2022

- Collaborated on a SaaS product that helped users throughout various stages in their career transition, utilizing Ruby on Rails, Handlebars and JavaScript.
- Member of the development team that completed a major business project, successfully achieving >100% of Product and Business growth objectives in 2021.
- Helped manage projects using Agile Scrum methodologies.
- Assisted in monitoring development and production workflows on platforms such as AWS and GitHub.
- Contributed to developing responsive design, new feature components, and defined a user flow to ensure a seamless user experience.
- Converted an existing feature that consumed Meetup's Rest API to their new GraphQL API.

Web Developer

Freelance | 2020 - Current

- Worked with creative clients and digital agencies to design and build websites to tell their stories online, and connect with customers in a seamless experience.
 - Somewhereelse - Worked closely with designer to redesign the website, and created a customized experience that reflected the client's new offerings into the digital space. Built with Gatsby, React, GraphQL, and Wordpress as a CMS.
 - Spacecadet - Twitterverse App - Worked with client to produce a web app that utilized a custom API and showed select influencers' best tweets of all time. Built with React and Node.
 - PureSunFarms: COA - Worked with client to produce a page where the customer can search a production lot number and be provided with detailed, scientific information on their product.
